A better trip on Hills M2

Since we completed our Hills M2 upgrade in August 2013, we have seen a significant reduction in congestion and peak hour travel times—both are big benefits for northwest Sydney commuters.

Independent travel surveys carried out in October 2013 measured significant peak travel times savings for a trip on the full length of the Hills M2 compared to a key competing route.

A motorist travelling from Westlink M7 to the Lane Cove Tunnel could save on average more than 35 minutes each morning and 40 minutes in the afternoon peak compared to travelling an alternative route from Seven Hills Road via Old Windsor Road, Pennant Hills Road and Epping Road.

ROUTE TRAVELLED	HILLS M2	ALTERNATE ROUTE*
Eastbound AM peak	15 minutes	52 minutes
Westbound PM peak	20 minutes	61 minutes

* Alternate route: Old Windsor Road / Pennant Hills Road / Carlingford Road / Epping Road between Seven Hills Road and Lane Cove Tunnel
