

ENVIRONMENT

POLICY

Transurban is a toll road owner and operator with a vision to build stronger communities through transport. This recognises that what we do, and how we do it, has a real impact on the productivity of our cities, the daily lives of the residents and the environment on which we all depend.

We aim to ensure that all levels of our management, employees and contractors actively participate in minimising impacts to our environment.

To achieve our vision throughout our business activities and supply chain, we have made a commitment to:

- ▶ continually improve our environmental performance
- ▶ meet our environmental compliance and legislative obligations
- ▶ eliminate or reduce risks that may lead to harmful environmental incidents
- ▶ integrate environmental considerations into planning and procurement decisions, including encouraging good environmental practices from our contractors and suppliers
- ▶ prevent pollution to land and natural waterways
- ▶ manage air quality in our tunnels and noise along our roads
- ▶ implement opportunities to improve energy efficiency
- ▶ reduce waste to landfill through efficient reuse and recycling
- ▶ minimise our use of potable water
- ▶ enhance the biodiversity value of our road projects and assets, and to
- ▶ seek offices in buildings that provide best practice green building status.

To ensure that we deliver on these commitments, we are developing an Environment Management System (EMS) to the international standard AS/NZS ISO 14001:2004. The EMS helps us to:

- ▶ systematically identify and manage environmental risks and opportunities
- ▶ set objectives and measurable targets
- ▶ heighten compliance and regulatory awareness
- ▶ prevent or reduce environmental harm
- ▶ deliver environmental awareness training to maintain a supportive culture
- ▶ effectively engage with stakeholders
- ▶ measure progress towards our targets, and
- ▶ transparently report on our environmental performance and achievements.

Our Environment Policy will be made available to all employees and contractors and to the public, to communicate our environmental commitment.

Our EMS will be continually monitored, audited and reviewed to ensure it remains effective and aligned with best practice.

Scott Charlton
Chief Executive Officer
October 2013
